

Porta Meter Data Sheet

Integrated potential monitoring meter

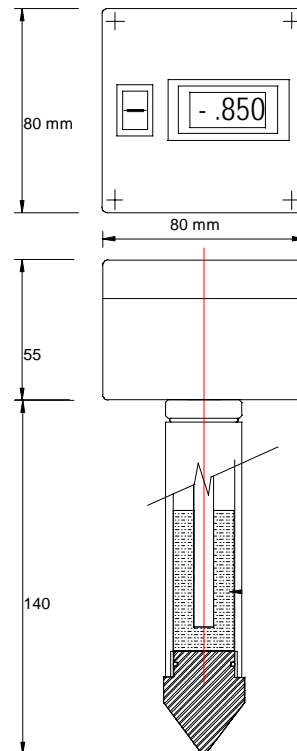

A complete self contained unit for measuring structure to earth potentials without the encumbrance of loose cables, cells and meters.

pml have developed this handy portable meter for general field use, for routine maintenance and for hot spot checks.

The instrument comprises a standard copper / copper sulphate half cell (reference electrode) mounted integrally with a high impedance voltmeter.

Meter readout is in a clear digital form with a range of 0 to -1.999 volts.

Meter impedance of 10 megohm per volt ensures good accuracy for general purpose use at an economical price.

For details of Price and Delivery please contact **Pipeline Maintenance Limited** at the address shown below.
